

# high- performance sport floor systems

EASILY INSTALL AN OLYMPIC STANDARD  
FLOOR AT A NOVICE PRICE TAG

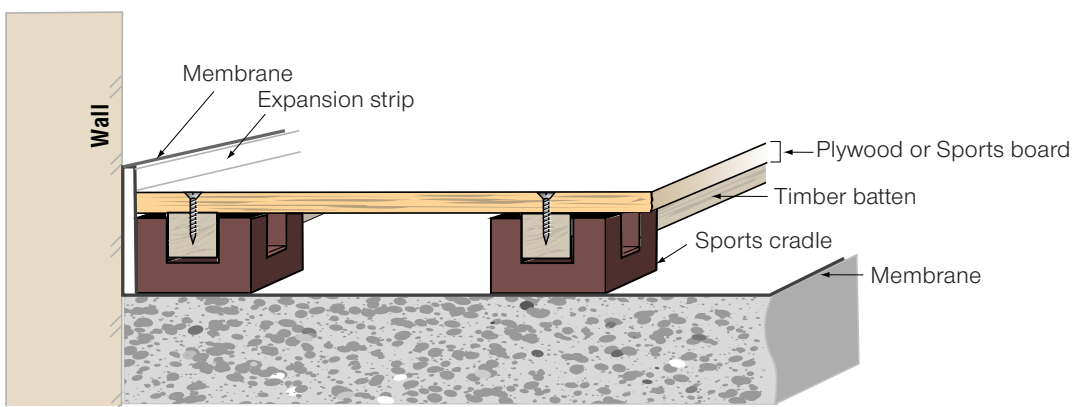

# sports cradle and batten system

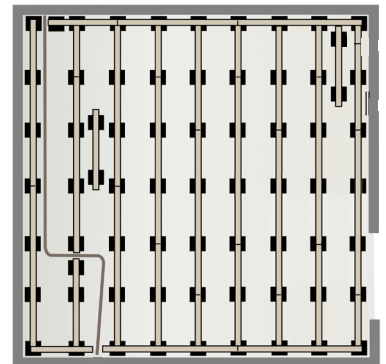

Introducing the new standard for indoor sports flooring. Combine these specialized rubber crumb cradles and base packers with timber battens to create a floor system that is versatile, fully adjustable on site and suited for installation on uneven floors. The system requires absolutely no cement, which means there's zero drying time — only construction time.

## PERFECT FOR

- SPORTS COMPLEXES AND GYMNASIUMS
- NEW BUILDINGS
- REFURBISH OLD FLOORS
- MULTI-USE AND RECREATIONAL AREAS
- EXAMINATION HALLS
- DANCE AND EXERCISE STUDIOS

## about InstaSport

- High performance sports cradles with floor levelling system
- Patented rubber crumb cradles are made from recycled tires and guaranteed to last for 60 years
- Environmentally friendly: one recycled car tire makes 18 InstaCradles

# perfectly level floor every time

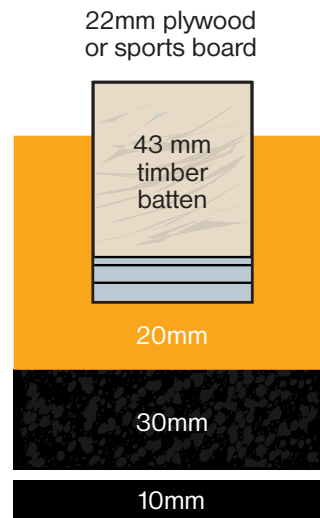

No matter the shape of the sub-floor or the design criteria, InstaSport's patented design is a cost-effective way to leave a laser finish every time. By using different sizes of cradle packers and cradle base packers, it's easy to make a variety of height adjustments at every point of the installation.

Each cradle comes with cradle packers in 2mm or 5mm heights, and base packers that are either 10mm or 30mm high. These may be used in multiples to easily achieve the desired finished floor height in a matter of minutes.

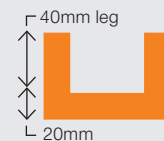

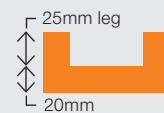

## benefits

- Zero maintenance
- Cost-effective and easy to install
- Suitable for all types of structural sub-floors – no preparation required
- Run various services under the floor space, including heating
- High performance long lasting systems with a 60-year guarantee
- Adjustable for varying heights in the structural sub-floor and finished floor
- Cradles are unaffected by moisture
- Can include access hatches and fittings for permanent sports equipment
- Avoid the expensive cost of replacing the concrete screed if it fails
- Shock absorption helps dampen sound
- Complies with EN 14904 and BS 6399: Part 1
